

VIDLO Institute Suit

CUSTOMIZED SOLUTION

OUSL university structure and processors are differs from a standard university process, and departments follows different process.

OUSL University Management System is a fully customized solution to fulfill OUSL requirements.

E SECURITY

Security module is implemented throughout the University Management System.

Different user level manages functionality of the system. Administrator is able to setup different authentication levels for users.

This enables different level of authorization and rights management for different modules.

WEB SOLUTIONS

Full integrated web based solution, and My OUSL published in the internet for students.

OUSL

The Open University of Sri Lanka (OUSL) is one of the recognized universities in Sri Lanka, established by Government of Sri Lanka under university act in 1978.

OUSL current enrolment is 30,000 students, including four departments as well as sub centers. OUSL is unique within the national university system in being the only University to offer programmes of study leading to certificate, diploma, degree, postgraduate diploma and postgraduate degree through the Distance Mode, and students can follow courses in full-time and part-time basis. OUSL aims to provide higher educational opportunities to working adults - providing them the road to success, surpassing age, vocation, gender, race, ethnicity and religion.

Open University of Sri Lanka (OUSL)

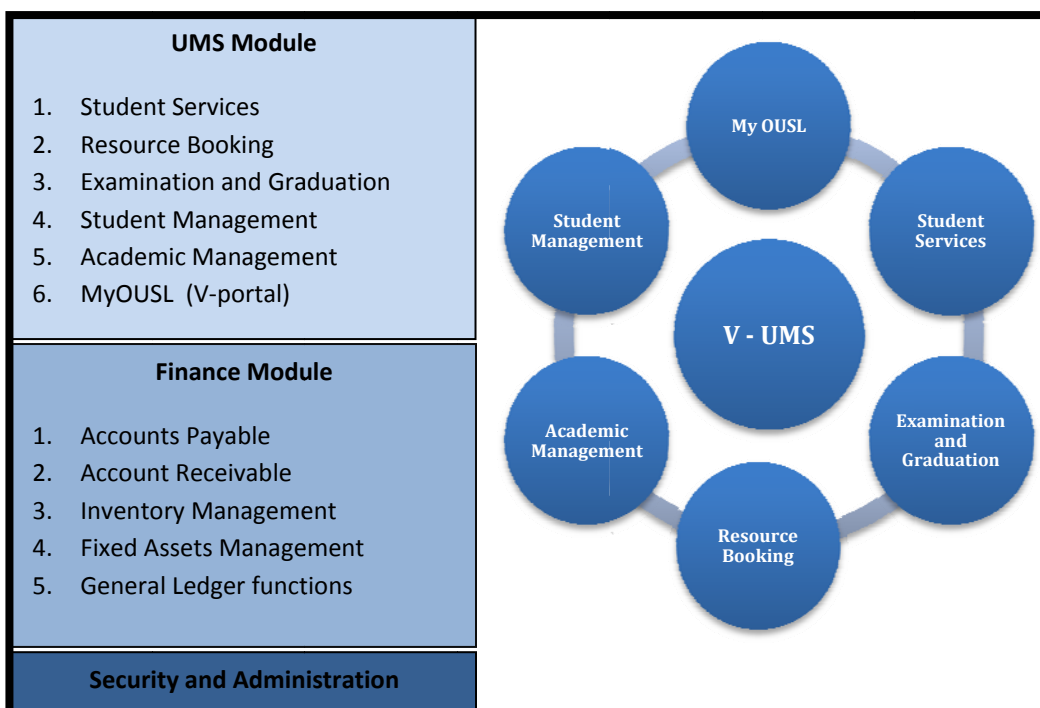

Situation

The Open University of Sri Lanka is being modernized under the Sri Lanka Education Modernization Project, as Capacity Enhancement initiative. OUSL aims to assist the University to be capable of managing the expected growth in student enrolment from 23,000 students in 2005 to 46,000 by 2009, with the expected growth in mind the University is focusing on implementing a new infrastructure along with a university system to cover full business process. OUSL new requirement is to automate processors from student registration to deregistration along with the supporting modules, and the new system should be able to communicate with its centers based in different parts of the country.

After considering the capacity and accuracy of the process university decided to go ahead with VIDLO institute management, modules included fully functional UMS, V-finance and V-portal. OUSL decides to go ahead with VIDLO institute because of customizability, remote accessibility, and accuracy.

The Solution

VIDLO institute suit went live in 2008 December, implementation took 8 months. The software has reduced legacy system maintenance costs and allowed the university to modernize its process. It is fully integrated with other systems like library management system and e-learning system.

System Overview Diagram

Benefits

1. **Flexible reporting** - High level reporting and analytical tools in throughout the solution helps manages to formulate decisions on up to date information, reports are fully customizable and enabled with drill down and graphical charts.
2. **Make use of latest technologies** - VIDLO UMS reporting capabilities enable authorities to analyze data about any area from student information to financial results. This provides critical management level reports for decision making for a better tomorrow.
3. **Process Automation** - UMS is designed to coordinate all the resources, staff members can seamlessly manage the processers of the student life cycle, beginning with marketing and registration and ending with graduation.
4. **Accountability** - Implementing a single integrated solution reduces cost and data redundancy, opportunity to lower hardware and software cost. UMS solution helps staff members to respond quickly and cost efficiently in vital situations, and gives increased financial control and better cash flow.
